

NAME

`gma go download-presets` – Download die-roll presets from a GMA server

SYNOPSIS

(If using the full GMA core tool suite)

`gma go download-presets [args ...]`

(Otherwise)

`download-presets -endpoint [hostname]:port [-for username] [-global] [-output path] [-pass password] [-user username] file ...`

DESCRIPTION

`Download-presets` connects to a GMA server and retrieves the die-roll presets stored there for the logged-in user or the one named by the `-for` option. The die-roll preset data are then stored locally in the format documented by `gma-dice(5)`.

OPTIONS

The following options control the action of `download-presets`.

`-endpoint [hostname]:port`

Connect to the server at the specified TCP port.

`-for username`

Retrieve the presets for *username* instead of the user you are logged in as.

`-global`

Retrieve only the system-wide global presets.

`-output path`

Store the preset data in the named file.

`-pass password`

Log in to the server with the specified *password*

`-user username`

Log in to the server with the specified *username* (default “GM”).
